Graphic Representation of Tree Form, Balance and Protection Zone

Canopy is drawn to account for any natural asymmetry or imbalance. Crown Representation is scaled to account for north, east, west and south radii.  
 Root Protection Area (RPA)  
 This area relates the "RPA" radius as defined in the Tree Survey Table and is measured from the tree centre.  
 This area defines the preliminary Construction Exclusion Zone (CEZ) that must be protected by fencing from the potentially damaging affects of construction activity.
